ATTACHMENT TO NOTICE OF ALLOWABILITY

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 1, 2009 has been entered, resulting in the entry of the claim amendments originally filed June 1, 2009. Claim 1 has been amended. Claims 1-2, 4-6, and 43-46 are now allowed for the reasons indicated below.
2. In accordance with 37 C.F.R. 1.126, allowed claims 1-2, 4-6, and 43-46 will be renumbered as claims 1-9, respectively (see MPEP 608.01(j)).

Withdrawal of species election

3. Independent claim 1 is now an allowed claim. Accordingly, upon further consideration and in view of the amendment of claim 1 and the allowability of that claim, the restriction requirement with respect to dependent claims 43-44, as set forth in the Office action mailed on August 30, 2007, is hereby **withdrawn**.
4. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Art Unit: 1634

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. **The following is an examiner's statement of reasons for allowance:**

As discussed previously in, e.g., the Office action of September 10, 2008, the data in the specification establishes the existence of multiple mutations in the PRKCG gene that are associated with adult onset cerebellar ataxia in different groups of human individuals, as well as other mutations in that gene for which a disease association is not yet clearly established. The claims have been amended such that they merely require "screening" for disease associated mutations by comparing a PRKCG gene sequence of a human individual with adult onset cerebellar ataxia with instant SEQ ID NO: 3 to identify differences that alter the amino acid sequence of human protein kinase C gamma, and performing cosegregation analysis to determine whether an identified mutation is disease associated. The guidance provided in the specification enables the practice of such methods. Further, the prior art does not teach or suggest the methods of the claims, which require a step of comparing a first nucleic acid sequence of a human PRKCG gene from a "human subject exhibiting adult onset cerebellar ataxia" with SEQ ID NO: 3 "to identify a difference" which alters the amino acid sequence encoded by the gene. It is again noted that the Declaration under 35 USC 1.132 filed December 12, 2008 established the Chen et al reference as being applicant's own work. Brkanac et al (Arch Neurol 59:1291 [August 2002]; cited in the IDS of May 2007) disclose the mapping of an SCA14 locus to chromosome 19q13.4-qter (see entire reference). However, Brkanac et al teach that this region encompasses "more than 250 genes" and that analysis of additional families will be needed to identify a target gene (see page 1295, left column); accordingly, given the teachings of the prior art, an

ordinary artisan could not have predicted the existence of mutations such as those exemplified by applicants, and further would not have had a reasonable expectation that a method comprising step 1(b) could be performed successfully in screening for mutations associated with adult onset cerebellar ataxia in humans.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
